

BHARATH S N

Software Test Engineer | Manual & Automation Testing

+91 6238367916 | bhara95@gmail.com | Thiruvananthapuram, Kerala | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

QA Engineer with hands-on experience in both manual and automation testing across web and mobile platforms. Currently contributing as a QA Engineer Intern at Logiprompt Techno Solutions, executing end-to-end testing on a live pharmacy products (Atom Wellness) covering web and mobile applications. Proficient in Selenium with Java, Page Object Model, TestNG, Cucumber (BDD), and Jira for test management and defect tracking. Background in documentation quality assurance and team leadership strengthens a detail-oriented, process-driven approach to software quality.

PROFESSIONAL EXPERIENCE

QA Engineer Intern | Logiprompt Techno Solutions, Thiruvananthapuram | Apr 2026 – Present

- Working on a live pharmacy products — Atom Wellness — covering both web application and mobile application (Android)
- Designed and executed comprehensive test plans and test cases in Jira covering multi-role user flows (SuperAdmin, Admin, Sales Manager, Distributor, Field Staff) with distinct access and functional permissions
- Built a Selenium Java automation framework using Page Object Model (POM) to validate user login, dashboard elements, navigation links across all user roles, and user creation with valid, invalid and empty fields
- Performed complete end-to-end manual testing for the user creation module, verifying data integrity, role assignment, field validation, and error handling
- Conducted functional, regression, and cross-browser testing on web; executed functional and exploratory testing on the mobile app
- Raised and tracked detailed bug reports in Jira including steps to reproduce, severity, priority, screenshots, and expected vs actual results
- Collaborated closely with developers to verify defect fixes and re-test resolved issues within sprint cycles

Software Testing Training & Project Work | STC Technologies, Thiruvananthapuram | Sep 2025 – Mar 2026

- Completed an intensive, industry-aligned training program in Manual and Automation Testing with real-world project deliverables
- Built end-to-end automation framework for OrangeHRM PIM module using Selenium WebDriver, Java, TestNG, Maven, and Page Object Model
- Developed a BDD automation suite for a Flight Reservation System using Cucumber, Gherkin feature files, and Page Factory
- Practised test case design, defect reporting, regression testing, and cross-browser testing on both projects
- Gained working knowledge of Jira for test management, Git/GitHub for version control, and Agile methodology basics

Senior Document Specialist → Cell Lead | RR Donnelley Ltd, Thiruvananthapuram | Oct 2020 – Jul 2023

- Produced and quality-reviewed annual and semi-annual financial reports for global clients, maintaining strict accuracy and compliance standards
- Led a team of 5, overseeing process adherence, timelines, and quality checklists before final client delivery
- Developed a strong eye for defect identification, content validation, and documentation consistency — skills directly transferable to QA

Quality Controller (Contract) | RR Donnelley Ltd, Thiruvananthapuram | Dec 2019 – Apr 2020

- Reviewed documents for formatting, data consistency, and compliance errors; maintained 85%+ quality scores across all deliverables

KEY PROJECTS

Atom Wellness – Web & Mobile Application | Apr 2026 – Present

- Live QA engagement: tested a multi-user pharmacy platform with role-based access
- Automated login, dashboard, and navigation link validation for all user roles using Selenium Java + POM framework
- Full manual testing of the user creation workflow on web; functional and exploratory testing on mobile app (Android)
- Test management and bug reporting handled entirely in Jira

OrangeHRM – PIM Module Automation [GitHub](#)

- Automated functional test cases for employee onboarding workflows using Selenium with Java
- Designed and executed manual test cases to validate data entry and user creation
- Implemented Page Object Model (POM) framework using TestNG and Maven
- Performed cross-browser testing to ensure application compatibility
- Executed test cases and analyzed results to identify defects

Flight Reservation System – BDD Automation [GitHub](#)

- Developed a BDD automation framework using Cucumber and Selenium
- Created Gherkin feature files covering flight search and booking scenarios
- Implemented data-driven testing for multiple travel routes and combinations
- Used Page Factory for scalable and maintainable automation testing

TECHNICAL SKILLS

Automation Testing	Selenium WebDriver, Java, Page Object Model (POM), Page Factory
Manual Testing	Test Case Design, Test Scenarios, Execution, Defect Reporting, Regression Testing
Frameworks & Tools	TestNG, JUnit, Cucumber (BDD), Maven, Eclipse
Testing Types	Functional, Smoke, Regression, Cross-Browser, Mobile App Testing
Defect & Test Management	Jira (Test Cases, Bug Reports, Sprint Tracking)
Version Control	Git, GitHub
Database	MySQL
Performance Testing	JMeter (Basic)
Methodologies	Agile/Scrum (Basic)

EDUCATION & CERTIFICATIONS

B.Tech – Mechanical Engineering | Cochin University of Science and Technology (CUSAT) | 2013 – 2017 | CGPA: 6.7

Certifications: Certified Software Testing Training Program (CSTP) | ISTQB Certified Tester
